

ORACLE BUSINESS ACCELERATOR FOR ORACLE E-BUSINESS SUITE 12.1.3

KEY FEATURES

QUICK FACTS

- 62 Business flows
- 50 Oracle E-Business Suite products

WHATS IN THIS RELEASE

- Automatically Configure Taxation for more countries
- Support for Oracle Virtualization Support
- Advanced Configuration Technology

ACCELERATOR ASSETS

Leading Practice

- Business Flows
- Functionality Guide
- Solution Footprint

Education & User Acceptance

- User Productivity Kit
- Flow Scripts
- Process Models
- Business Case Presentation

Project Team

- How-to Guides
- Online Configuration Tool

The Comprehensive Solution for Businesses of Any Size

Oracle Business Accelerators deliver world class functionality to answer the challenges facing manufacturers. Companies face intense global competition and strive to keep supply chain costs low while maintaining compliance and customer satisfaction. Excellence in supply chain execution is key to gain and protect a leadership position in the marketplace. Organizations must innovate to manage escalating costs and drive efficient project and services management. Business applications must be scalable to enable growth with minimized initial implementation outlay, protecting your investment over time.

Oracle Business Accelerators allow you to choose from leading practice business flows based on implementation requirements. They provide a hosted model to speed implementations: Answer questions in a secure, online tool and automatically configure Oracle applications on customer hardware, or at Oracle On Demand, or through a partner's hosting service. Implementation work can begin before hardware is in place. Use assets provided to educate and inform users about the business flows enabled. This accelerated approach results in faster time to transaction testing.

Sample Business Flows Enabled

Period close to Financial Reports

- Automates period closing and reporting
- Quickly and effectively generates key financial reporting requirements across the enterprise

Order to Shipment

- Fulfills customer orders in an order to shipment environment
- Executes varied customer shipment models (standard or drop shipments, ATO, PTO)
- Efficiently manages order cycle information –pricing, available to promise (ATP), booking, shipping and credit holds

Sourcing Requirement to Agreement

- Establish vendor base, outsource non proprietary components and track supplier performance
- Manage the entire procurement cycle from RFQ to final purchase agreements/contracts
- Complex coordination of global/regional outsourced manufacturers and Service Providers

*Note for Human Capital Management (HCM):

- HCM flows and the related functions and products listed below address United States requirements.
- The Human Resources product is optionally available for other countries. This enables HR to be manually configured after the Accelerator portion of the implementation is complete
